

Thank you so much for allowing me to work on this project. It was an enjoyable and fantastic experience for me. I hope you will have liked my work. You always have a revision so you can contact me anytime. This is an all in one document that covers some basic get started guide.

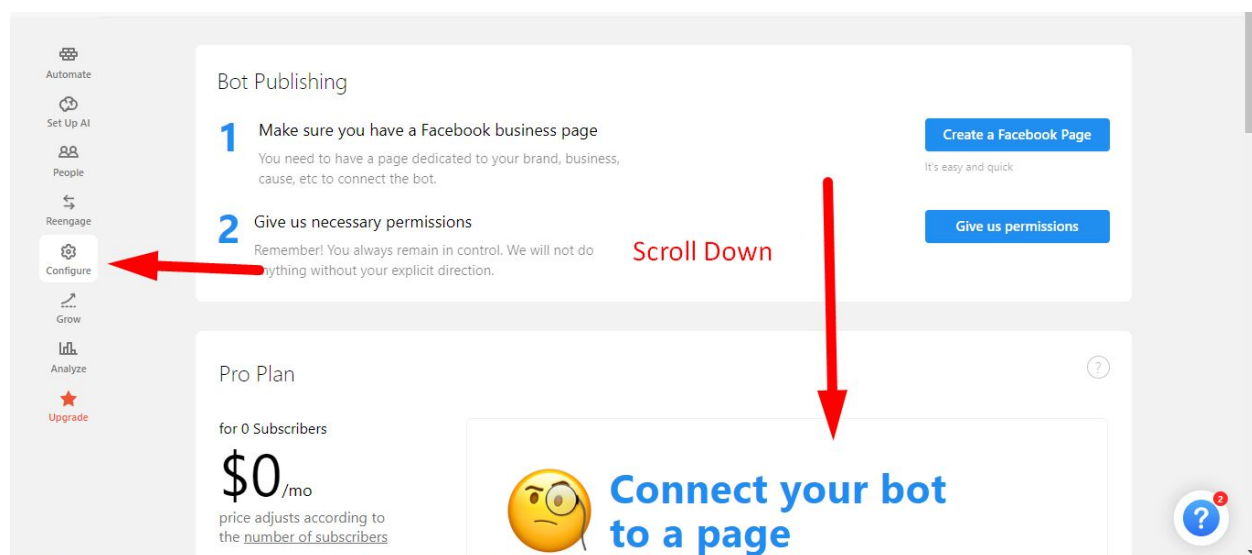

I have installed licenses of everything on the website so you don't have to worry about it.

Activating Chatbot On Website

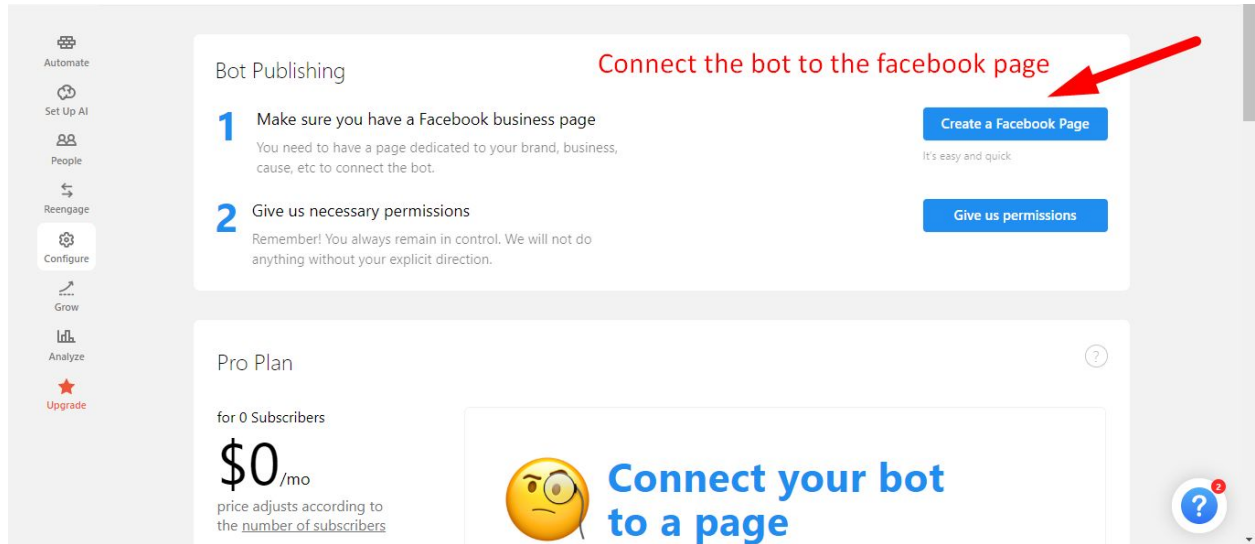

Activating chatbot is a very simple process. First of all, you need to accept the admin request I sent with the order. To accept click on the link I shared with the order.

Please follow these easy steps after clicking on the link and accepting the bot.

Step 1 –

Step 2 -

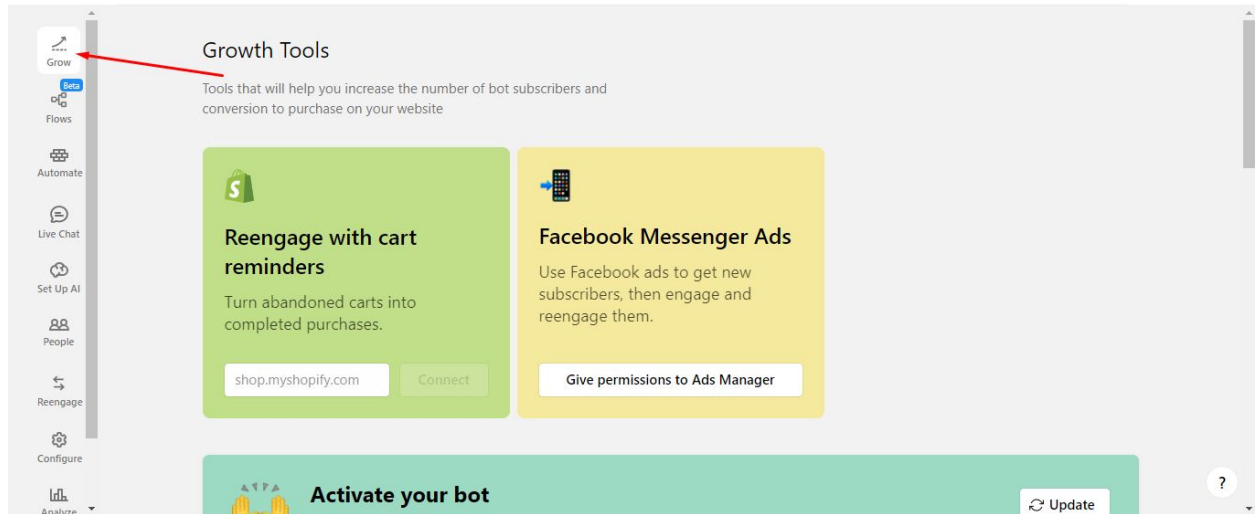

The screenshot shows a web interface for bot publishing. On the left is a vertical menu with icons and labels: Automate, Set Up AI, People, Reengage, Configure (highlighted), Grow, Analyze, and Upgrade. The main content area is titled 'Bot Publishing' and contains two numbered steps:

- 1 Make sure you have a Facebook business page**
You need to have a page dedicated to your brand, business, cause, etc to connect the bot.
[Create a Facebook Page](#)
It's easy and quick
- 2 Give us necessary permissions**
Remember! You always remain in control. We will not do anything without your explicit direction.
[Give us permissions](#)

A red arrow points to the 'Create a Facebook Page' button. Below the steps is a 'Pro Plan' section showing '\$0 /mo' for 0 subscribers, with a note that the price adjusts according to the number of subscribers. To the right of this is a large box with a thinking face emoji and the text 'Connect your bot to a page'. A help icon (?) is in the top right of the main content area, and a notification icon (?) is in the bottom right corner.

Step 3 -

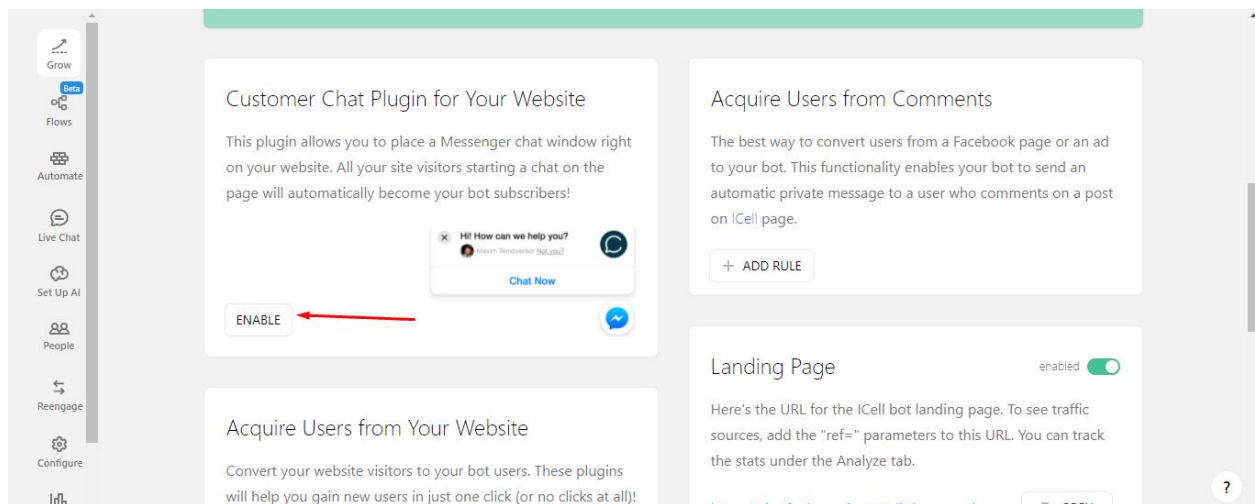

You need to then click on the 'Grow' button in the vertical menu.

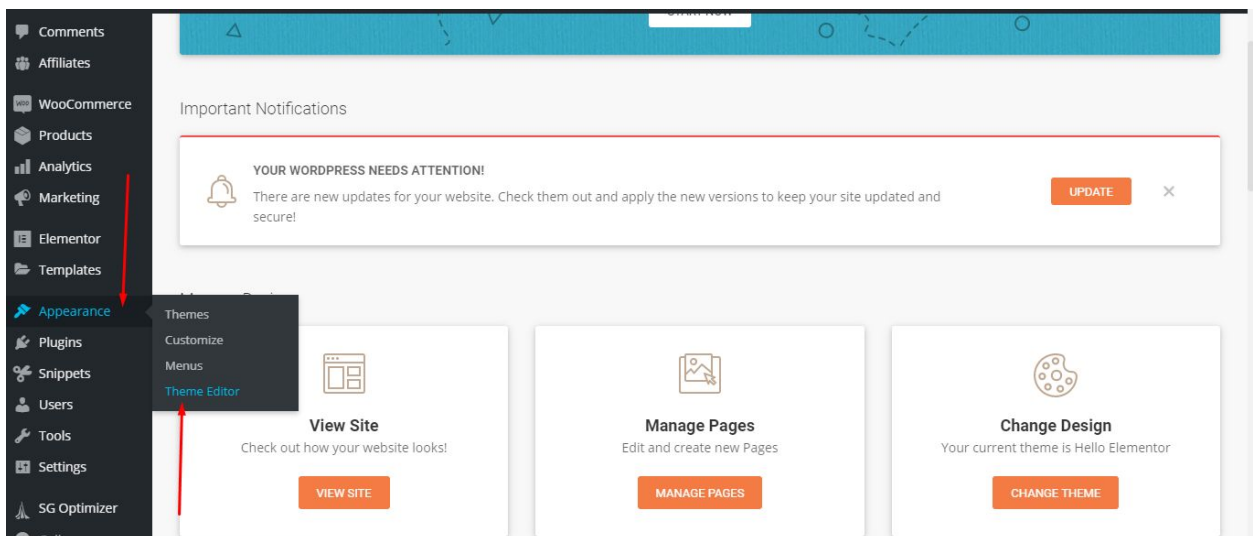

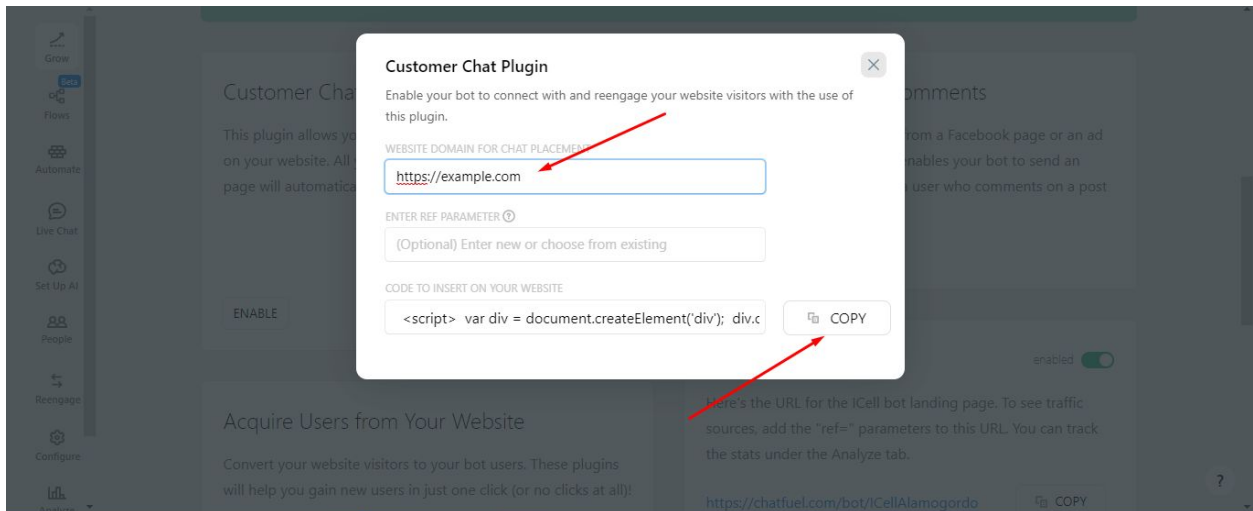

Step 4 -

Here scroll down and click on 'Enable'. Here enter the website URL and copy the code. Now head back to wordpress dashboard. In the wordpress dashboard hover on 'Appearance' and click 'Theme Editor'.

Here or theme editor click on 'Header.PHP' and paste this code in the

Here scroll down and paste the code after the body tag [In the 24th line].

Congratulations :) The bot is now live on the website :) You can now remove me from the admin.

Editing A Page, Header & Footer.

All the pages are created with Elementor Pro and so it is easy to edit the text.

Go to the page you want to edit [On the actual website itself] – Remember that you are signed in. If you are signed in you will see a black bar at the top like in the image.

Hover over on it and you will find two options – Header & Footer. If you want to edit these the click on them.

If you want to edit the page simply click on the text itself [Instead of hovering you have to click this time]

And you will be in the edit section then.

Editing The Product Page.

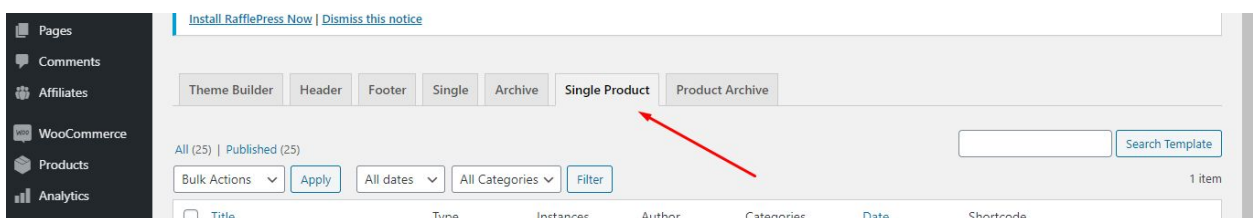

To edit the product go to

WordPress dashboard => In the vertical menu click on 'Products' => You will find the product.

You may change the prices on the front-end but to change it globally you need to change the prices in the product section. You can change the values from here.

To change the layout and front-end you need to do it at one more place.

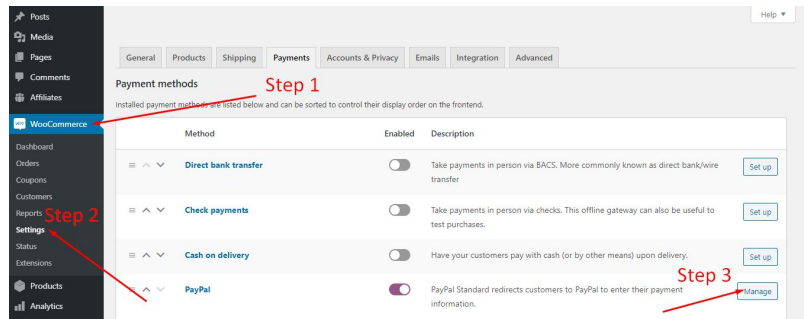

Wordpress dashboard => In the vertical menu hover over on 'Templates' under Elementor => You will find an option for 'Theme Builder' => Click on this => You will find a menu here => Click on 'Single Product' => You can edit now.

Editing The PayPal Email

To edit the PayPal email you need to go to

Wordpress Dashboard => Woocommerce => Settings => PayPal => Manage

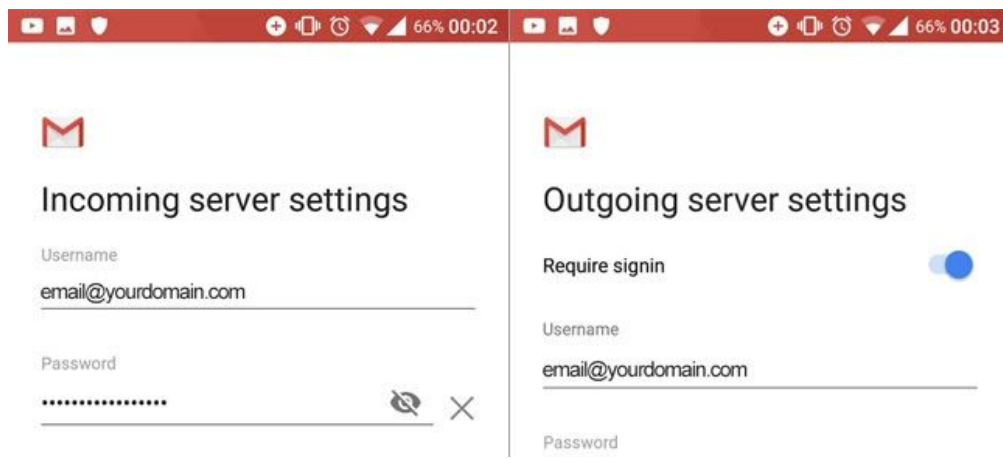

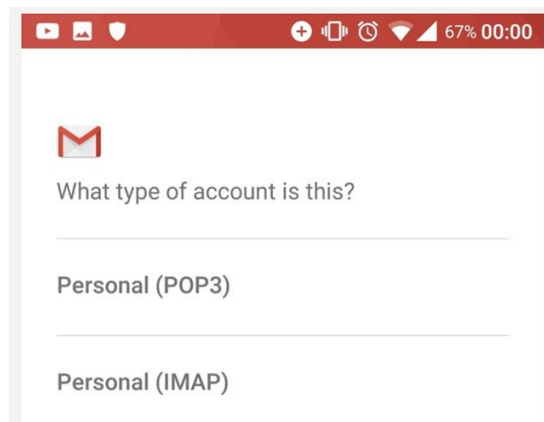

Accessing The Business Email

You can access the business email from

cPanel =>> emails =>> accounts

If you want to make this process easier and want to log in to this email in your Gmail app on your phone – Follow the below-given procedure.

Go to your Gmail => add account => other => enter the business email and password => It will ask for IMAP or POP2 => Choose IMAP => Enter the values as in image.

Changing The Product Price/Name/Image

To change things such as product price, name, images and other general things follow these steps.

Wordpress dashboard => products => all products => find the product you want to edit => scroll down => Below description you will find a section with bunch of options. Here you can change the prices.

To change the prices of variable product [A product which has variation] click on add-one - It is present within this section only. Here you will find all the variations => click on the variations you want to edit => save after changing.

Conclusion

Thank You So Much for choosing me to do this job. I really hope you will like my work. You can ask for support any time :)

At the end:

Please don't forget to give me a rating as it will help me get more clients and ultimately pay my bills! It will help me with Fiverr Algorithm.

Thank You Once Again and Take Care :)

- Ben
